We Help Your Ideas Grow

Canws is a software development studio that builds scalable, design-led digital products. With 8yrs of expertise and over 300+ projects shipped with a top rating of 4.9★. We combine strategy, design, and engineering to turn complex ideas into market-ready solutions. Fast, reliable, built for long-term growth.

The Challenge

Our mission was to create an enterprise-grade, transparent ecosystem where inspection gaps vanish, and every issue is logged, tracked, and resolved.

AWS

The Feature Offerings

Smart Inspections

Conduct inspections with guided tools that let you capture issues using photos, notes, and structured details—ensuring accurate and consistent reporting every time.

Issue Identification

Easily log, categorize, and prioritize flaws so critical issues are addressed quickly and nothing gets missed during the review process.

Task Assignment

Assign issues to the right people or teams with clear ownership, priorities, and accountability to keep work moving forward efficiently.

Resolution Tracking

Track progress in real time from inspection through final resolution, with full visibility into status updates and completed actions.

Centralized Dashboard

Manage multiple communities, inspections, and tasks from one unified dashboard that provides clarity, oversight, and control at a glance.

Real-Time Notifications

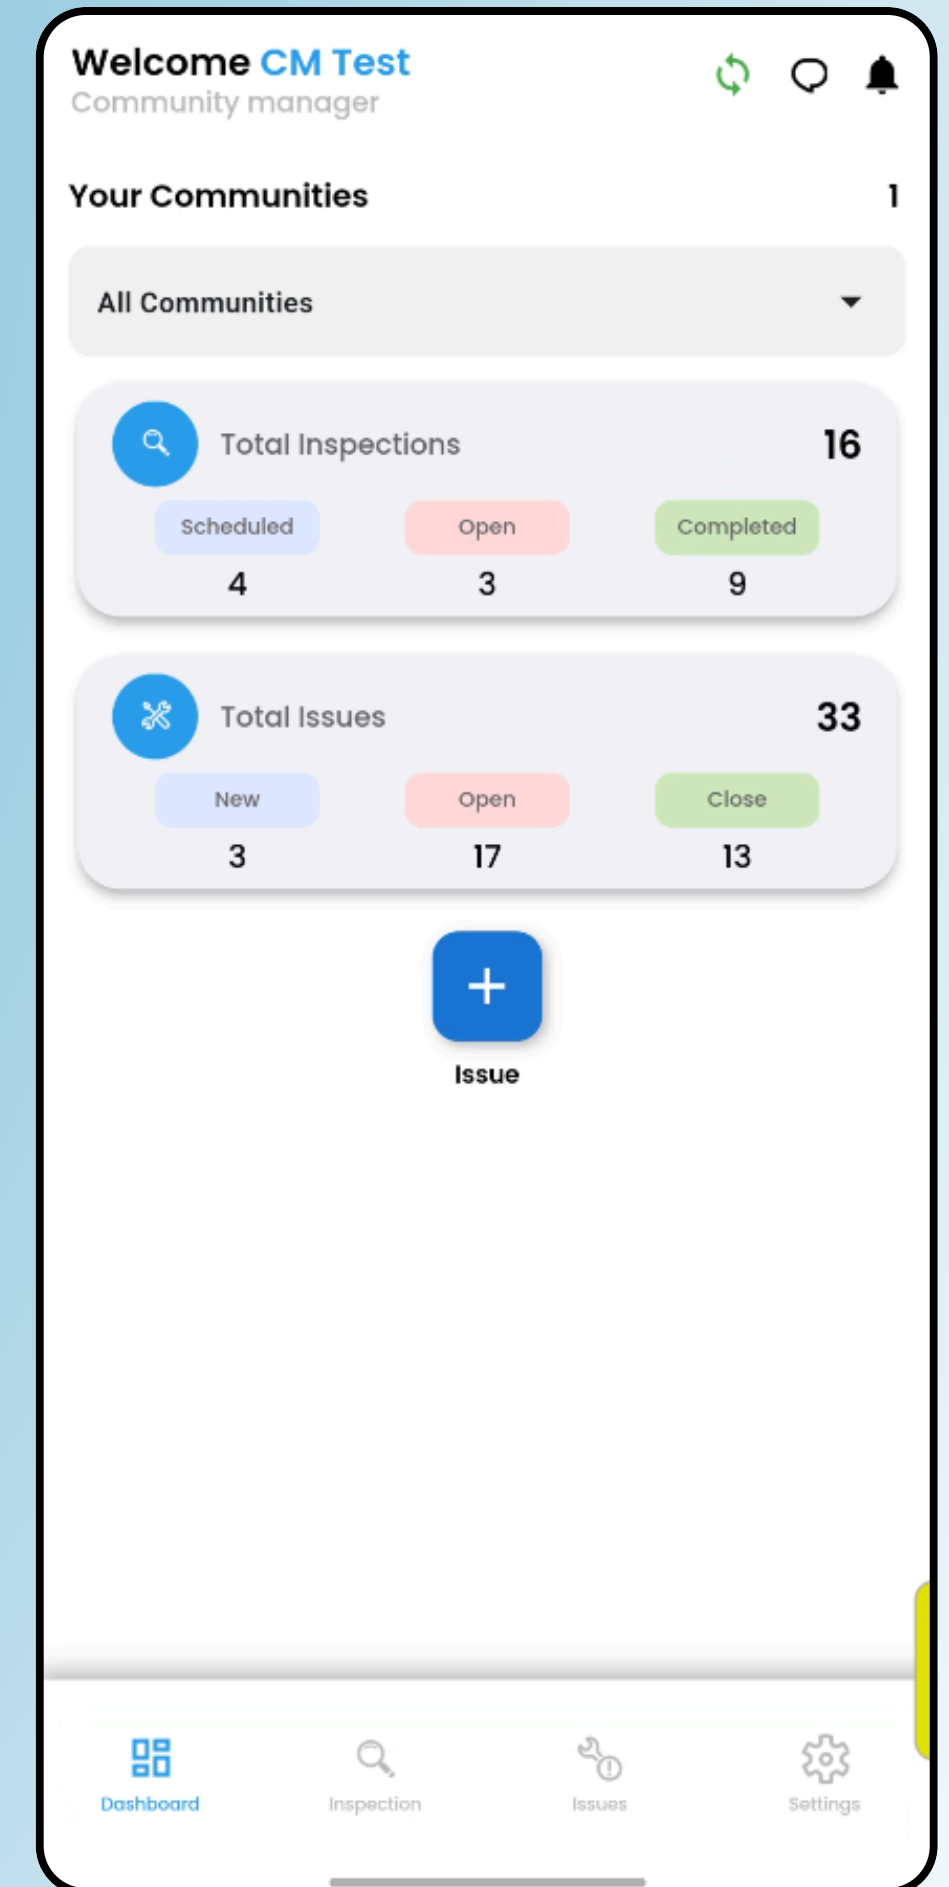

Stay informed with instant alerts for new inspections, task assignments, progress updates, and issue resolutions—so nothing slips through the cracks.

App Design & User Experience

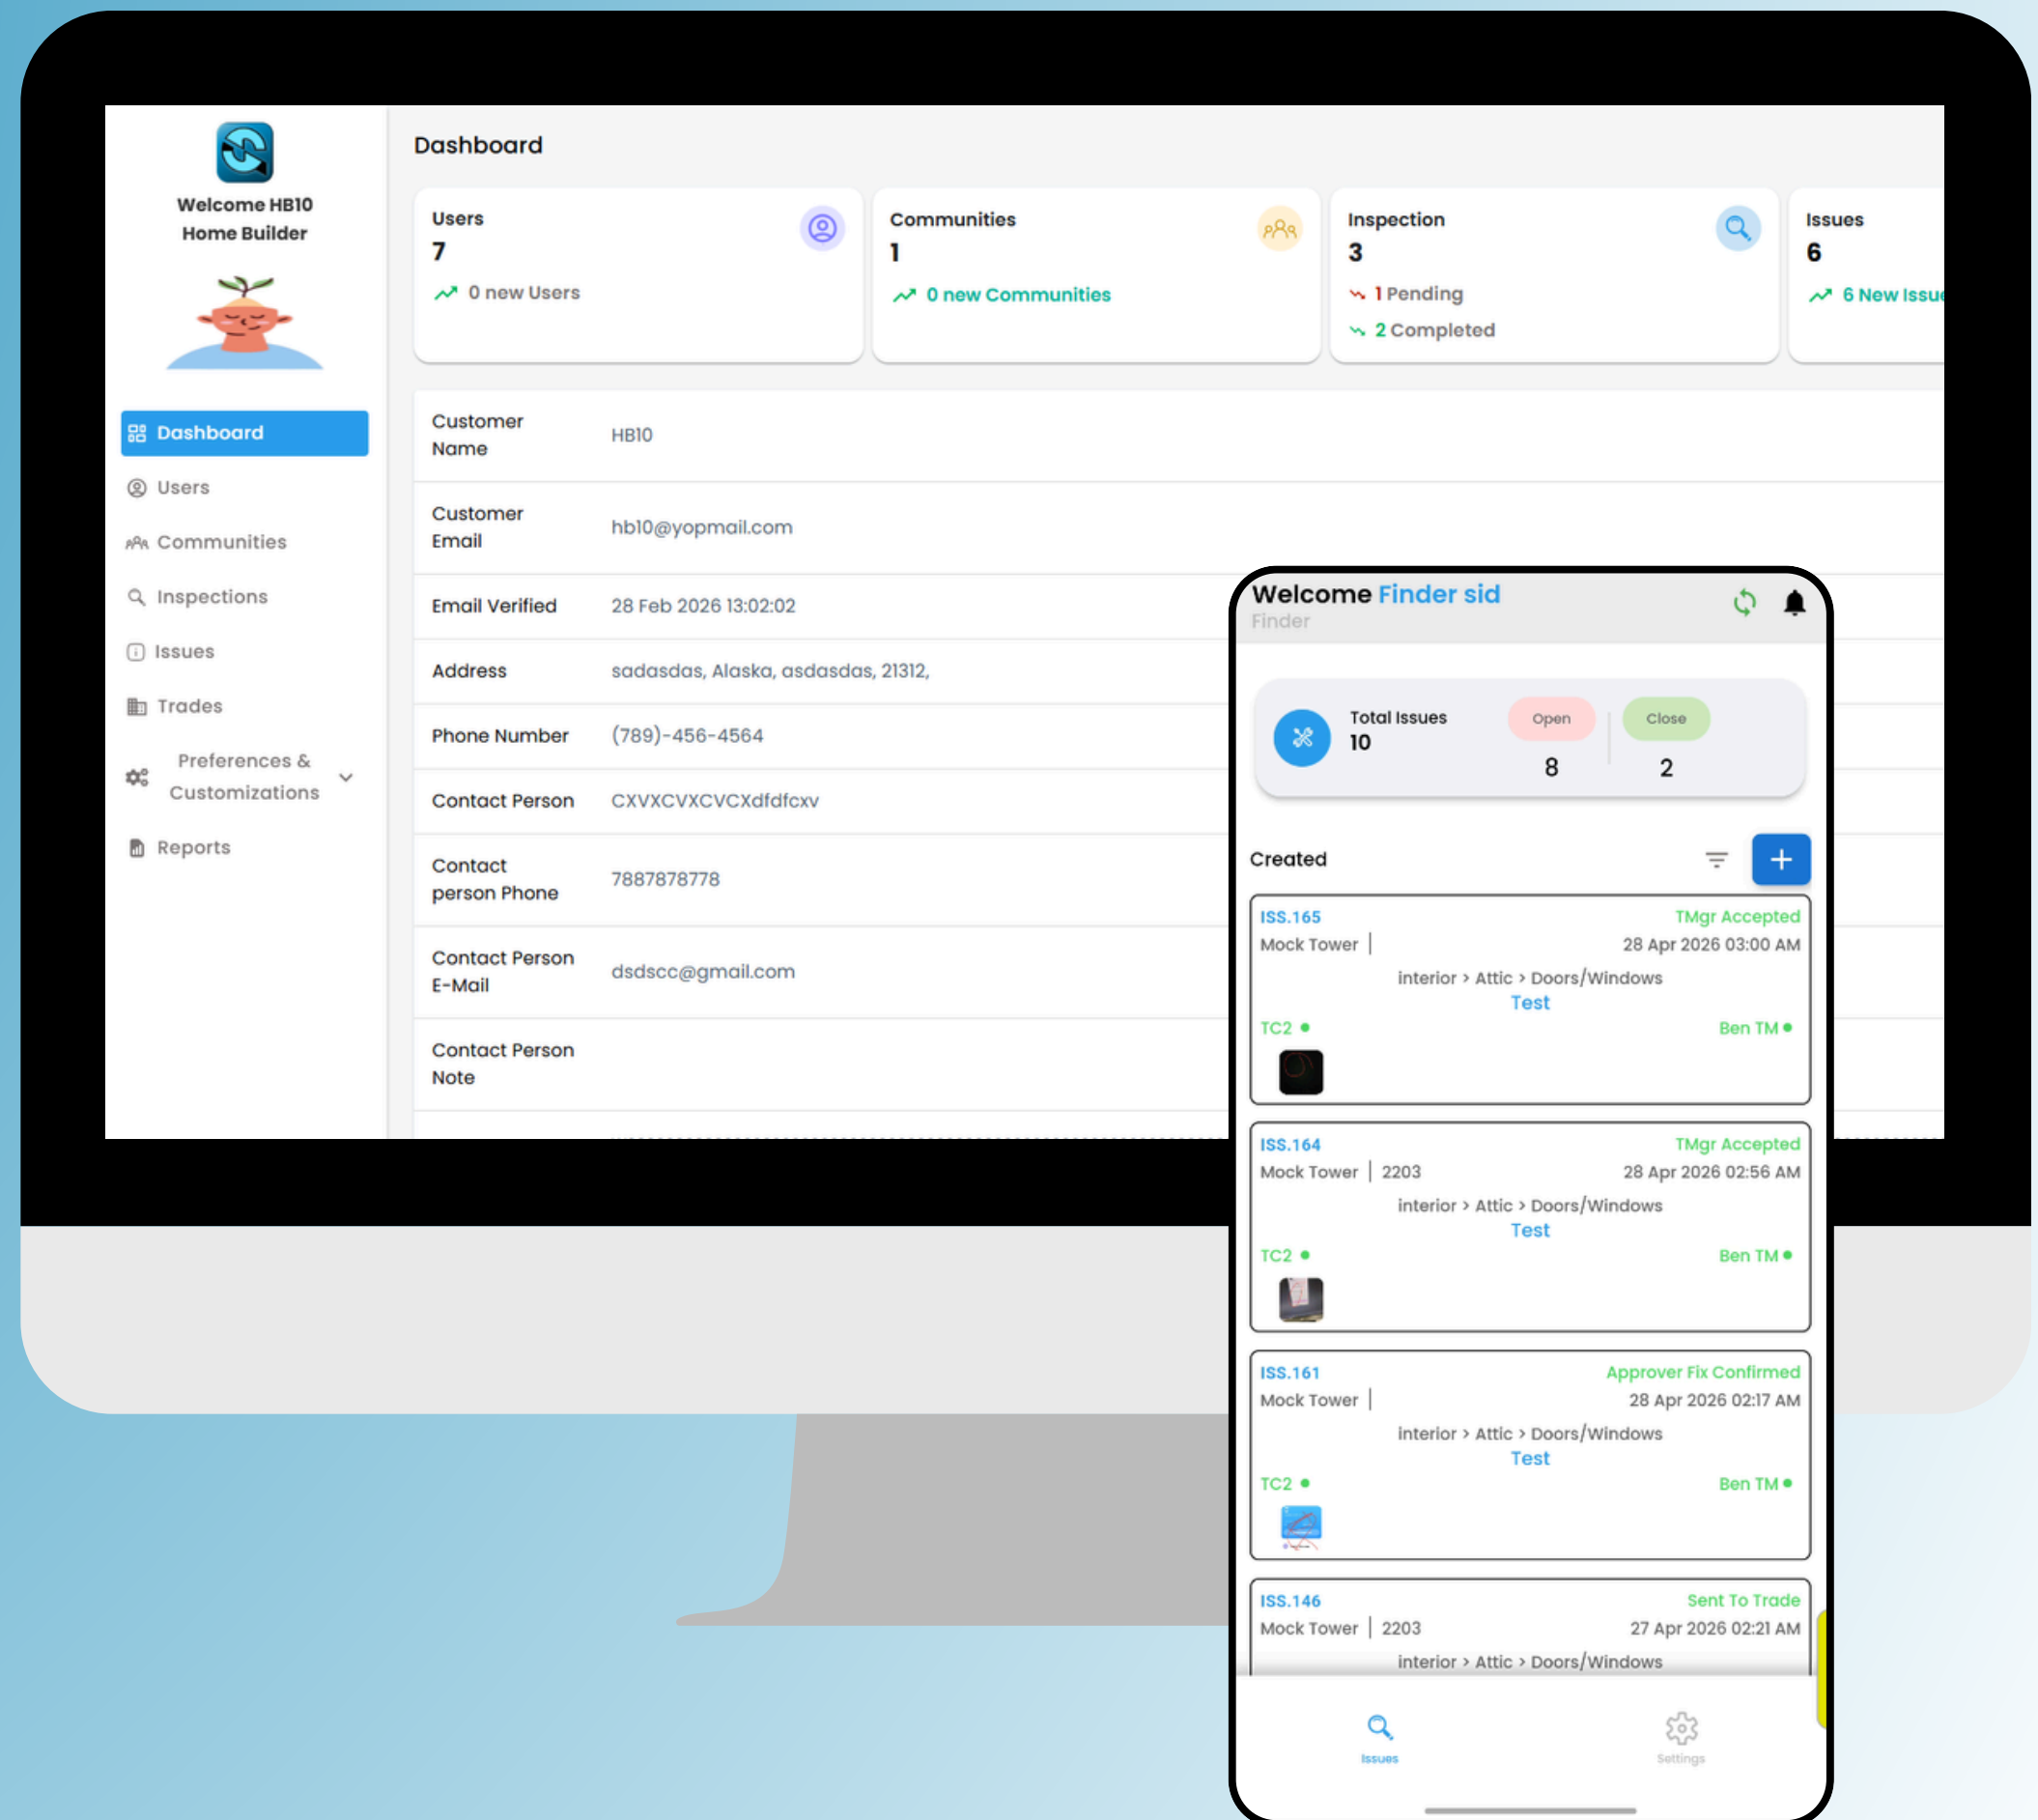

We designed every screen with structural clarity at the core - from complex multi-zone onboarding flows to rapid on-site defect logging - combining tough industrial aesthetics with science-backed UX.

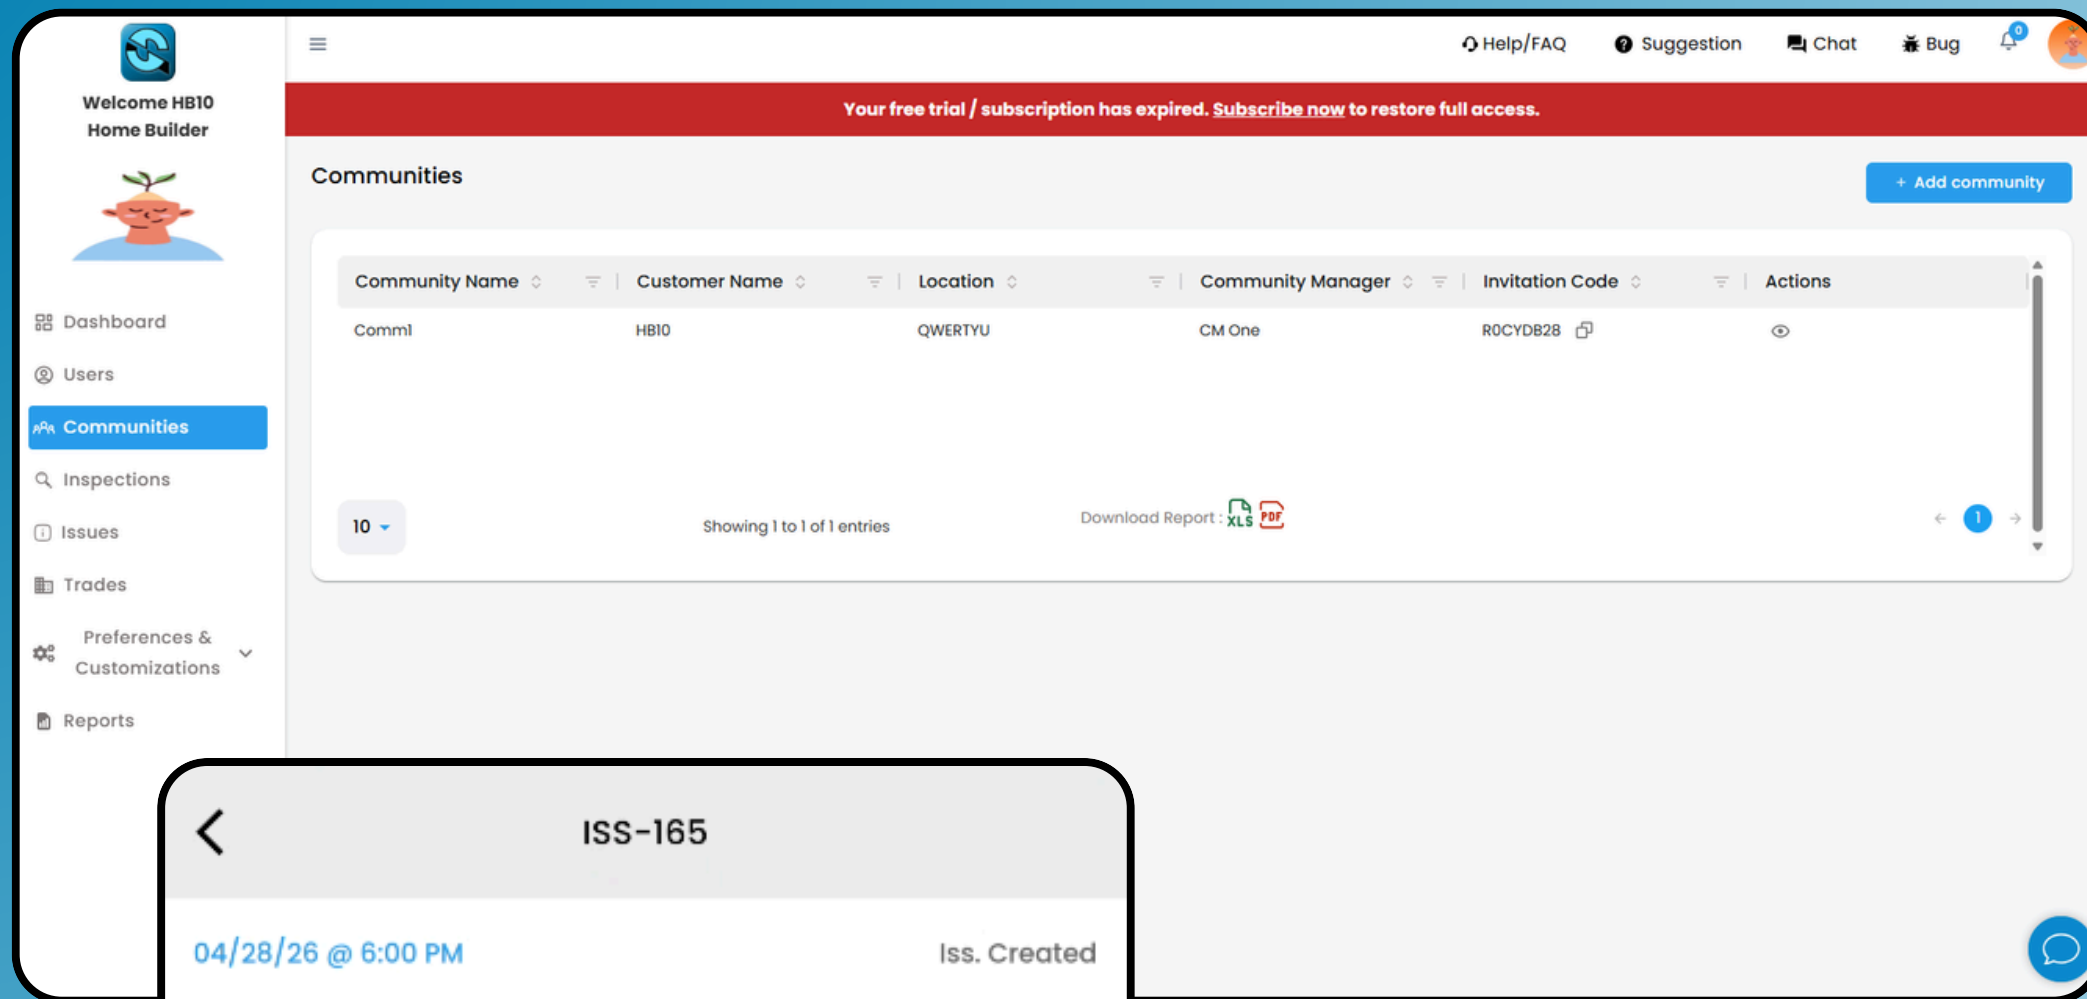

- User Research & Persona Mapping (Homebuilder vs. Trade)
- High-Fidelity UI & Unified Enterprise Design System
- Mobile-First Responsive Layouts (iOS & Android)
- Inspect -> Flag -> Assign -> Resolve workflows

Architecture & Delivery

We built a scalable, offline-first enterprise backend handling real-time issue syncing, heavy media uploads, role-based access management, multi-tenant site moderation, auto-assignment workflows, and cross-platform push notifications - all industry-compliant on AWS.

End-to-End Delivery

All core reward systems built, integrated, and deployed in a single release

100%

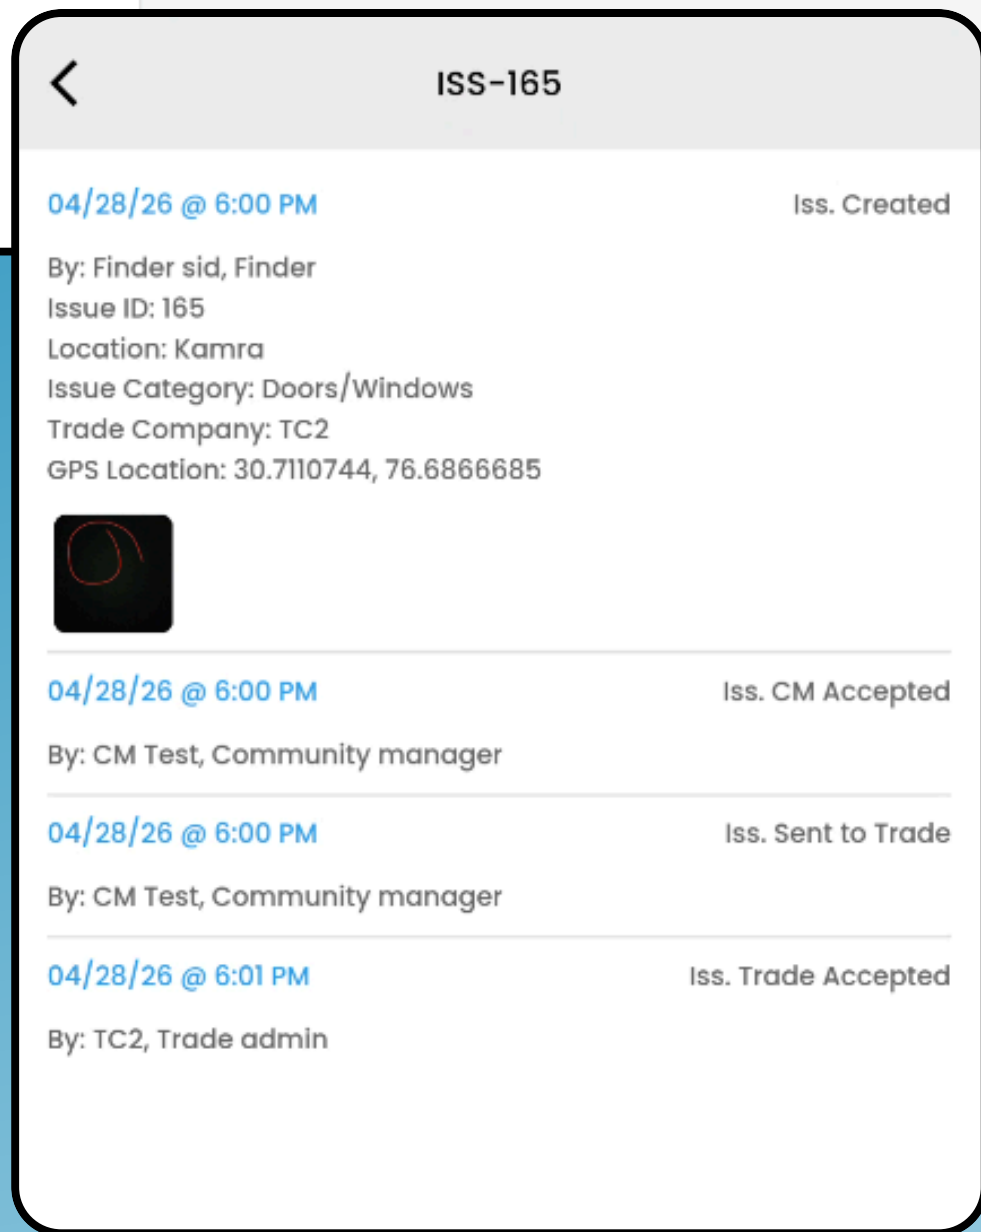

Regulatory compliant — EU consumer protection & data privacy standards met

Day 1

Production ready — scalable AWS architecture with CI/CD pipelines ensuring stable, secure deployments

40-60%

Accelerated resolution lifecycles vs. coordinating site issues.

What We Can Build For You

With a 10+ year experienced team and 20+ products shipped, we're ready to be your end-to-end tech partner.
